

**The National University of Singapore**  
**Department of Civil Engineering**  
**Faculty Position in Geotechnical Engineering**

The Department of Civil Engineering, National University of Singapore invites applications for a tenure-track faculty position in the area of geomechanics, ideally with applications to geo-hazards and geo-sustainability, and preferably with background and experience in element testing. Applicants should hold a doctorate in Geotechnical Engineering. The opening is at the assistant professor level, but exceptional well qualified applicants may also be considered at the associate professor level.

Postdoctoral experience is highly desirable. The successful candidate must be able to teach effectively at both the undergraduate and graduate levels and develop an active and impactful research programme.

NUS offers internationally competitive remuneration, relocation assistance and other benefits. Newly recruited tenurable faculty members are eligible for start-up grants to facilitate the establishment of their research development in NUS. Details of terms and benefits are available on

<http://www.nus.edu.sg/careers/potentialhires/workinginnus/index.html>

Interested candidates should send their detailed curriculum vitae, copies of transcripts, statements of research and teaching interests and professional goals, and the names of three references to:

Head of Department  
Department of Civil Engineering
